

Freedom

Massimiliano Raggi

FREEDOM

Freedom riproduce la forma di una gabbietta. "Freedom" in inglese significa libertà e il suo segno di riconoscimento è costituito da un uccellino metallico posto grazie ad una calamita al di fuori della gabbietta stessa, proprio ad indicare la libertà da ogni costrizione. Lampada da esterno IP65, è disponibile nella versione cablata o a batteria. Completa l'offerta una serie di accessori laccati neri che ampliano le possibilità di utilizzo della lampada Freedom.

Freedom reproduces the shape of a cage. Its sign of recognition consists of a metallic bird placed outside the cage with a magnet, in order to symbolize freedom from any constraint. An IP65 outdoor lamp, it is available in the wired or battery version. The offer is completed by a series of black lacquered accessories which expand the possibilities of using the lamp.

**ISTRUZIONI PER L'USO****VERSIONE CABLATA**

fornita solo con connettore IP68. In caso di collegamento con spina, il grado di protezione passa da IP65 a IP44.

VERSIONE BATTERIA

La luce lampeggiante all'interno della lampada indica che la lampada è completamente scarica.

Collegare la spina all'impianto elettrico per caricare la lampada e/o il corpo batteria. Controllare che lo spinotto sia inserito correttamente nella presa.

Lasciare in carica per circa 4 ore (12 ore al primo utilizzo) con la lampada SPENTA.

Se si prevede di non utilizzare la lampada per un lungo tempo è **NECESSARIO** effettuare un ciclo di carica completo prima di riparla per evitare che la batteria si danneggi in quanto dotata di sistema di autoconsumo in mancanza di utilizzo. Al riutilizzo si dovrà procedere con una nuova ricarica della batteria (12 ore) prima dell'accensione.

INSTRUCTIONS FOR USE**WIRED VERSION**

supplied only with IP68 connector. In case of connection with a plug, the degree of protection changes from IP65 to IP44.

BATTERY VERSION

The flashing light inside the lamp indicates that the battery is completely discharged. Connect the plug to the electrical system to charge the lamp and/or the battery body.

Check that the plug is inserted correctly into the socket.

Leave to charge for about 4 hours (12 hours for first use) with the lamp OFF.

If you do not plan to use the lamp for a long time, it **MUST** be completely charged before storing it; this prevents damage to the battery, as it is equipped with a self-consumption system in the absence of use. When re-used, the battery must be recharged again (for 12 hours) before switching on.
